

Abstract of the Disclosure

A synchronous or synergeticly timed fuse is installed into ordnance(bombs, artillery shells, depth charges etc.) , the ordnance is delivered to a target area and a simultaneous. {synchronous), or a synergetic (not neccessarily synchronous yet the energies add together to be greater than their individual parts), explosion event occurs. This explosion event can be enhanced by the shape the ordnance is configured in (a shaped charge on the order of meters or kilometers).
